

HitchMate® Motorcycle Carrier

transporting for your active lifestyle

HitchMate motorcycle/scooter carriers are designed to safely transport a single two wheeler on most any vehicle equipped with a class 4 towbar receiver.

HitchMate carriers are a channel design with multiple and adjustable tiedown points complete with a full length lockable loading ramp, ADR compliant lighting with rego plate holder, visibility reflectors and a fitted adjustable front tyre chock.

All standard and included:

- Manufactured with structural steel tread plate channel to our specifications
- Solid stainless fasteners, both 304 & 316 grade
- Fully powdercoated in hammertone charcoal
- Carrier can be assembled to load from either the left or from the right and will accommodate a motorcycle with wheelbase up to 1530mm
- Ramp security padlock included as standard

On-Road or Off-Road

We manufacture two specific motorcycle carriers for distinctively different user applications.

The On-Road model is designed to carry a motorcycle/scooter up to 130kgs on improved roadways, dirt or gravel surfaced unimproved roads of reasonable condition. This reinforced single insert design makes for a very secure and substantial connection.

The Off-Road motorcycle carrier will safely transport your motorcycle most anywhere the host vehicle will go. Designed primarily for rugged driving conditions and/or more robust motorcycles, this multi-insert carrier can be accommodated by a vehicle with a fully exposed class 4 towbar with at least 2.3 tonne capacity. Minimal install is required but not difficult and just like our On-Road model is easily attached and removed for storage.

Designed and Manufactured in Australia

Accessories

Risers:

HitchMate motorcycle carrier platforms can be raised above the position of the vehicle's towbar insert with our Riser accessory. The insert(s) provides additional ground clearance to virtually eliminate the possibility of the carrier scraping on ground.

Winching System:

HitchMate motorcycle carriers are designed to accept an optional motorised winching system permitting a single rider to easily and safely load a substantial and/or manual clutch motorcycle themselves. This cost effective accessory was developed for a physically challenged Vietnam veteran and has proven to be a reliable and logical loading solution.

No-Rattle:

Our newly sourced No-Rattle bracket collars and secures any insert into a class 4 towbar eliminating annoying rattle, adding structural stability far superior to a tapped grub screw. Easy attachment of this bracket does not alter, modify or effect the integrity of the vehicle's towbar.

HitchMate® Cargo Carrier

transporting for your active lifestyle

HitchMate is Australia's version of a motor vehicle accessory that is popular on highways and roads of both Europe and America. HitchMates are built for Australian roads – sturdy enough to take on both the best and the worst.

Attached to your motor vehicles class 4 towbar receiver, HitchMates are made of structural grade steel with a mesh alloy tray. This fully powdercoated and stainless steel fastened device will see that your cargo is transported safely and securely.

Cargo that is oversized or judged to be noxious or undesirable can be secured outside, away from passengers and their personal belongings.

No Ground Contact

**No Reduced Fuel
Consumption**

No Footprint Left Behind

Sedans, 4WDs, Wagons, Motorhomes, Utes, Commercial Vehicles

HitchMate cargo carriers are manufactured in three standard sizes to allow for compliant attachment to most vehicles equipped with a class 4 towbar. All three are rated to carry up to 160kgs of cargo, a far greater weight capacity compared to a traditional roof rack carrier and no ladder required. Wind drag is eliminated, fuel consumption is not compromised and no ground contact is made. No footprint is left behind.

Unlike a small utility trailer, a **HitchMate** cargo carrier has no moving parts to fail, no annual rego to pay, and reverses where you want and expect it to go.

- Camping, firewood, barbeques, LPG cylinders
- Fishing eskys, tackle boxes, bait buckets
- Lawnmowers, fertiliser bags, wheelie bins
- Push bikes, fun motorbikes, E-cycles, jerry cans, power generators,...whatever.

Cargo Boxes:

Quality **HitchMate** alloy boxes specifically designed for the RV enthusiast are now available.

Our superior domestically made aluminium boxes are secured to and carried by **HitchMate** cargo carriers and will accommodate generators, fuel and water, hoses, bar-be-ques, etc.

Cargo Carrier Accessories:

- Rear Rail(s) as shown
- ADR approved lighting both globe and LED
- Riser inserts for increased ground clearance
- Marker Poles for visual reference when reversing
- Green waste kits for garden refuse
- No-Rattle brackets
- Cycle tyre channels & ramps
