

Carrying a load?

So you're off on a driving trip with a little extra, or maybe you just need to clear out those weeds and trim the bushes in the back yard. How do you transport it safely and with ease? This cargo carrier could be the answer. The *HitchMate®* cargo carrier is a hitch mounted stationary platform that has been designed to supplement the cargo carrying capacity of any standard sedan, wagon, ute or four wheel drive. The simple insertion of *HitchMate®* into your motor vehicle's permanently mounted trailer hitch receiver provides the secure support connection. Now, cargo previously im-

possible or undesirable to accommodate can be externally secured and transported on the *HitchMate®* cargo carrier. The reinforced industrial design, premium materials and ultra-durable coatings make *HitchMate®* the strongest, most durable hitch mounted cargo carrier manufactured by anyone, anywhere. *HitchMate®* has a carry capacity of 160 kilograms, yet weighs only 15-20 kilograms. It is portable, easily stored against a wall,

and is virtually rust and corrosion proof. Unlike a roof rack you won't need a ladder to load your cargo so there won't be a problem with dents or scratches to your vehicle. Increased wind resistance and additional fuel consumption caused by roof mounted cargo is also eliminated. Best of all, the *HitchMate®* cargo carriers are manufactured and installed locally on the Sunshine Coast.

A range of accessories are

available to include road rails which are a practical addition for any *HitchMate®* cargo carrier. Sold in pairs, they provide a secure railing for the retention and safe transport of larger sized cargo.

The *HitchMate®* green waste carrier is a unique accessory for the transport of biodegradable garden refuse, and comprises two heavy-duty RHS rail frames, and two

commercial grade garden bags with aluminium bag retainer clasps and all necessary stainless steel fittings for installation. The design of this accessory allows for easy and trouble free assembly, disassembly, and storage.

Call in at 4/41 Premier Circuit, Warana, or phone 5437 8300. There is also a very informative website at www.hitchmate.com.au
