EVEN big SUVs sometimes have trouble packing in everything for the young, active family.

Now HitchMate provides a cargo solution suitable for a motorbike, bicycles, cooler and fishing or camping equipment.

It fits on to a permanent class IV tow-bar and has a carrying capacity of up to 160kg.

HitchMate weighs 15-20kg and is made on the Sunshine Coast using powder-coated galvanised

steel with a tempered aluminium mesh-bed and solid stainless-steel fittings.

It is compliant with all Australian safety codes.

There are three sizes: the \$359 Hitchie model is for compact vehicles, the \$399 Standard for mid-range cars and small utilities and the \$459 XL for full-size 4 x 4s, mobile homes and large sedans.

HitchMate comes with a range of accessories such as running light kits, road rails, weather-proof lockable chests, bicycle hoops, bungees and a T-bar riser insert designed for uneven terrain usage and raising the cargo level a full 200mm allowing extra off-road clearance.

You can also select custom colours to match your vehicle.
